

RMC FLOODGUARD PROVIDES PEACE OF MIND

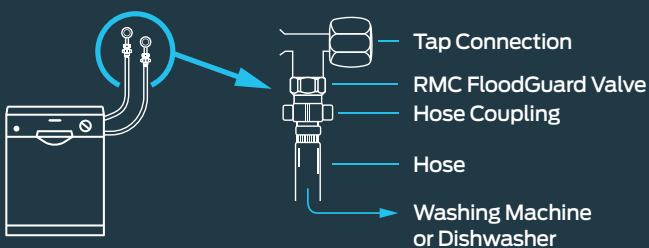

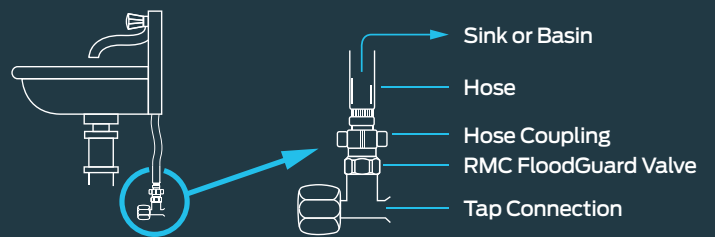

The RMC FloodGuard range has been designed to reduce the extent of flooding and water damage caused from burst flexible connection hoses. In the event of excessive water flow or hose burst, the valve automatically snaps shut to minimise water escape and damage.

15MM RMC FLOODGUARD VALVE

Easily installed at point of fixture installation or retrofitted at any time.

Ideal for sinks and basins fitted downstream from isolation valves and immediately upstream of flexible hose assemblies.

20MM RMC FLOODGUARD VALVE

Designed for quick and easy installation.

Best suited for appliances such as washing machines and dishwashers, and can be retrofitted at any time.

15MM RMC FLOODGUARD ISOLATING VALVE

Designed with a captive loose nut connection for ease of installation and incorporates the RMC FloodGuard protection built into the isolating valve.
