

## Class 1 FloodGuard - Flood Stop Safety Valves

### Building Product Information Requirements (BPIR)

**Product Line:** RMC Reliance Valves FloodGuard Valves

**Product Identifier(s):**  
FG500, FG501, FGI500

#### Product Description:

The FloodGuard range of valves are designed to allow water to flow normally until an excessive flow rate is detected. The FG500/FG501 valves shut off automatically until they are manually reset, the FGI500 valve automatically resets after activation by turning the isolating handle.

#### Relevant building code clauses:

B2 Durability —	B2.3.1 (a)
F2 Hazardous building materials —	F2.3.1
G10 Piped services —	G10.3.1
G12 Water Supplies —	G12.3.2, G12.3.7
H1 Energy efficiency —	H1.3.3

#### Contributions to compliance:

All items listed under Product Identifier(s) are approved to WMTS 479:2020. WaterMark licence number 026329.

#### Scope of use:

The RMC 15mm FloodGuard is designed to reduce the extent of flooding and water damage caused from a burst flexible hose, and is a male/female configuration.

The RMC 20mm FloodGuard valve is designed for quick and easy installation of appliances such as washing machines and dishwashers. They are a male/female configuration for ease of installation.

FloodGuard valves are intended to be fitted inline between the isolating tap and the hose connection to the fixture.

**Conditions of use:**

RMC Reliance Valves FloodGuard valves must be installed by a suitably qualified person according to the rules of AS/NZS 3500.1.
